3 TIPS TO BATTLE HIGH INFLATION

1.) Postpone Large Purchases. Both the car market and housing market are super wild right now. Although nobody can predict the future, experts suggest waiting until these markets cool off before making a large purchase.

2.) Cut Wasteful Spending. If inflation is breaking your budget, try cutting back on some of those non-necessity items. From cutting streaming services you're not using to buying store-brand foods, there are plenty of ways to cut spending and keep your family ahead.

3.) Look for deals. Sometimes spending a little time searching for a good deal or coupon is worth the effort! There are plenty of apps out there, like Good RX or Ibotta that can help you save money on things you would buy anyway. Additionally, working your grocery list around products that are on sale at the grocery store can lead to savings that really add up!

SAVING BIG

The holidays are over, but that doesn't mean they won't be around again next year. If you felt financially frustrated the past few months, try getting your saving plan in place now! Putting back \$100 a month will net you \$1200 by December. We can even set the saving up on auto transfer so you don't have to think about it!

PROTECTING YOURSELF

Unfortunately, with harder financial times also come big scams. Ensure that you are only putting your debit/credit card information into safe and secure websites. Look for: a lock icon to the left of the website in the address bar, a website that starts with https:// (the s is the important part), and a privacy policy. While this may not prevent all online fraud, it can deter quite a few scammers from getting your information!
